

Early Social Development and Intervention Lab

Dr. Jessica Bradshaw
Lab Director, Assistant Professor
Department of Psychology
University of South Carolina

We follow infants and their families...

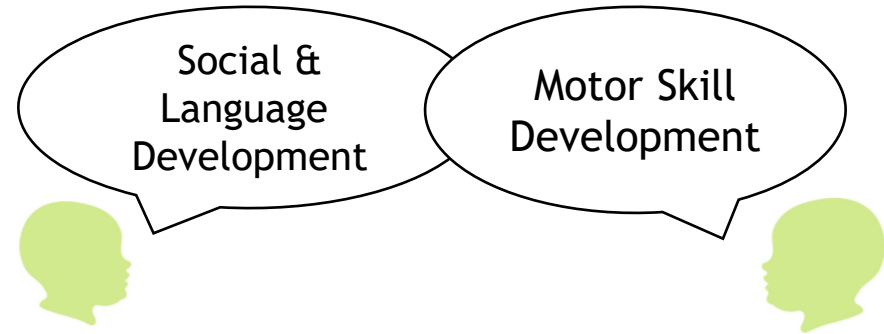

Birth

2-3 years

We look for early predictors of...

Our ultimate goals are to...

- Improve **early detection** of ASD
- Inform caregivers about their child's **developmental outcomes**
- Provide further **resources** for families
- Create a **community** for children with ASD and their families

What We Do

Who Can Participate

Infant siblings (0-6 months) of children with ASD

Infants born preterm (32-36 weeks)

Typically developing infants (0-4 months)

We are recruiting
expecting parents who fit
the above categories!

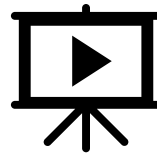

Lab Activities

In the lab participants will...

Engage in Developmental activities/assessments

- Interact with toys & caregivers

Watch short movies

Give Heart Rate Measurements

Lab visits will last **~2 hours every month** until the participant is 6 months old, and then **once every three months**

How to Participate

Families have the option of...

In-person

- Come into the lab
- Masks and safety protocols
- In-home visits

Virtual

- No contact
- Remote participation

Benefits to Parents

Feedback on their Child's Development

- ▶ Learn about developmental milestones as they are happening during lab visits
- ▶ Receive recommendations to seek further services
- ▶ Receive full clinical report at the end of the study

Monetary Compensation

- ▶ Receive \$25 gift card with every visit
- ▶ Opportunity to earn up to \$300
